

Terms of Service Overview

Owning area: Legal_Terms

Last reviewed: August 2026

Document ID: LEG-TS-001

Applies to: IronStore websites, mobile applications, customer service channels, and connected marketplace services operating in the European Economic Area (EEA), Switzerland, and the United Kingdom.

Purpose / Overview

This document summarises the rules governing customer use of IronStore services and the purchase of products through IronStore-operated channels. It provides an internal reference for Legal, Customer Operations, Product, Engineering, Finance, and Commercial teams.

The approved customer-facing Terms of Service remain the controlling document. This overview explains how those Terms must be maintained, implemented, communicated, and escalated. Teams must not publish alternative wording or make customer commitments that conflict with the approved Terms.

Scope

This overview covers:

- Customer account registration, access, and acceptable use.
- Product listings, pricing, ordering, payment, delivery, and cancellation.
- Returns, statutory withdrawal rights, warranties, and complaints.
- Promotions, vouchers, reviews, and customer communications.
- Marketplace sellers and third-party service providers.
- Changes to Terms, records retention, and legal escalation.

This overview does not replace:

- Country-specific consumer rights requirements.
- Privacy notices or cookie documentation.
- Seller agreements or logistics contracts.
- Internal information-security, fraud, or payment policies.

Where local law provides a customer with a higher level of protection than the standard Terms, the local legal requirement takes precedence.

Policy Statement / Procedures

1. Approved Terms and Localisation

IronStore must provide customers with clear, accessible Terms before an order is submitted. The applicable version must be available in the customer's browsing language and territory.

The Legal_Terms team maintains:

- The master English Terms in **Confluence: Legal / Customer Terms**.
- Approved translations in **Phrase** under project IRON-TERMS.
- Published versions in the **Contentful Legal Library**.
- Version metadata and publication evidence in **IronVault**.

Each territory-specific version must identify, where applicable:

- The contracting IronStore entity.
- Registered office and customer service contact details.
- Governing law and competent courts.
- Local withdrawal, warranty, and complaint rights.
- Accepted payment methods and delivery limitations.
- Marketplace seller information and seller responsibility.

Translations require review by an approved legal linguist or local counsel. Machine translation may be used for drafting only and must not be published without human review.

2. Customer Account and Acceptable Use

Customers may create an account using accurate information and must keep login credentials confidential. One person must not create accounts for abusive, fraudulent, or automated purchasing activity.

IronStore may suspend or restrict an account where there is credible evidence of:

- Payment fraud, chargeback abuse, or identity misuse.
- Bot activity, bulk purchasing, or voucher exploitation.
- Harassment of employees, sellers, or delivery partners.
- Attempts to interfere with site security or service availability.
- Repeated misuse of return, refund, or replacement processes.

Account restrictions must be recorded in **CaseHub** with the reason code, evidence link, decision owner, and review date. Permanent closure or restriction of access to statutory rights requires Legal approval.

Customers must not:

- Use scraping, automated checkout, or unauthorised browser extensions.
- Upload malware, unlawful content, or another person's personal data.
- Resell IronStore promotional benefits where prohibited by promotion rules.

- Use product reviews or ratings to manipulate search or seller performance.

Customer-facing suspension messages must be factual, proportionate, and limited to the information necessary to protect IronStore's legitimate interests.

3. Product Information and Pricing

Product information owners are responsible for ensuring that listings are accurate, complete, and suitable for the relevant sales territory. Required information includes:

- Product name, key characteristics, dimensions, and material where relevant.
- Total price, including applicable taxes and mandatory charges.
- Delivery costs, estimated delivery timeframe, and delivery restrictions.
- Safety warnings, age restrictions, conformity information, and responsible operator details where required.
- Seller identity for marketplace products.
- Availability status and any purchase quantity limits.

Pricing and promotional claims must be supported by evidence in **PIMCore** or the applicable campaign record. Claims such as “lowest price,” “limited time,” or “number one” require Commercial and Legal approval.

If a material pricing or product error is identified before dispatch, Order Operations must pause fulfilment and notify the customer promptly. The customer must be offered the legally required options, including cancellation and refund where applicable. Changes to an already accepted order require Legal review if the change disadvantages the customer.

4. Order Acceptance and Payment

An order confirmation acknowledges receipt of the customer's order. It does not necessarily mean that IronStore has accepted the order where the Terms state that acceptance occurs at dispatch or another defined event.

The checkout flow must:

- Display the selected products, quantities, total price, delivery charges, and applicable taxes.
- Require an express order action, such as “Pay and place order.”
- Allow customers to correct errors before submission.
- Provide access to the applicable Terms and privacy information.
- Generate an order reference and confirmation email.
- Store the accepted Terms version with the order record.

Payments are processed through approved providers connected to **Adyen** and **Checkout.com**. Teams must not request or store full card numbers outside approved payment systems. Suspected payment irregularities must be routed to Fraud Operations under **FRD-04**.

Refunds normally use the original payment method unless the customer agrees to another method. Finance must investigate unresolved payment or refund exceptions older than five business days.

5. Delivery, Cancellation, and Returns

The delivery promise shown at checkout must be based on the fulfilment service level recorded in **OMS Atlas**. If a delivery is delayed, Customer Operations must provide the customer with an updated estimate and the available legal remedies.

Customers may have a statutory right to withdraw from distance contracts. The relevant period, exclusions, return method, and refund process must be stated in the country version of the Terms.

Returns processing requirements:

- Return requests are logged in **ReturnFlow** against the order number.
- Eligibility is assessed using the applicable territory rules.
- Refund decisions are based on receipt, product condition, and statutory rights.
- Refunds must not be withheld solely because a customer used a preferred return carrier where the Terms permit another method.
- Damaged, unsafe, or incorrectly supplied products are escalated to Quality Operations.
- Exclusions for hygiene-sealed, personalised, digital, or perishable products must be legally valid and clearly disclosed.

Customer Operations should acknowledge a return or complaint within two business days. Standard refund processing is five business days after the return is approved, subject to payment-provider timelines.

6. Product Defects, Warranties, and Complaints

IronStore must distinguish between:

- Statutory consumer remedies.
- Voluntary manufacturer or IronStore warranties.
- Commercial goodwill offers.
- Marketplace seller obligations.

Agents must not describe a goodwill replacement as a waiver of statutory rights. Defect claims must be recorded in CaseHub with photographs, product identifiers, purchase date, and the remedy offered.

Safety complaints, suspected counterfeit products, and repeated product failures must be escalated within one business day to Product Compliance and the Legal Duty Manager. A product may be temporarily delisted where risk is credible and cannot be mitigated immediately.

Formal legal complaints, regulator correspondence, and pre-action letters must be forwarded to **Legal Operations** on the day received. Customer-facing teams must not speculate on liability or provide settlement commitments without approval.

7. Promotions, Vouchers, and Reviews

Every promotion must have a campaign record in **PromoDesk** containing:

- Campaign owner and approval chain.
- Start and end dates.
- Eligible products, territories, and customer groups.
- Discount calculation and reference-price evidence.
- Voucher limits, exclusions, and cancellation rules.
- Customer-facing Terms and required disclosures.

Promotional Terms require approval from the Commercial owner and Legal_Terms before launch. Technical implementation must be tested in staging, including expired, combined, refunded, and partially used vouchers.

Reviews must reflect genuine customer experiences. Moderation may remove content that is unlawful, defamatory, discriminatory, irrelevant, fraudulent, or contains personal data. Negative reviews must not be removed merely because they criticise IronStore or a seller.

8. Changes to the Terms

Legal_Terms reviews the master Terms at least annually and whenever there is a material change to law, business model, payment flow, fulfilment model, or marketplace functionality.

Change procedure:

1. Business owner submits a change request in **Jira project LEGAL**, including reason, territories, and implementation date.
2. Legal_Terms prepares revised wording and a change summary.
3. Privacy, Compliance, Product, and Customer Operations review impacts where applicable.
4. The Head of Legal approves material changes; the Legal Operations Manager may approve editorial changes.
5. Engineering publishes through Contentful after release testing.
6. IronVault stores the final version, approval record, translation evidence, and publication timestamp.

Material changes must be communicated with reasonable advance notice where required. The prior version must remain retrievable for the applicable retention period.

Roles & Responsibilities

- **Head of Legal:** Owns policy interpretation and approves material Terms changes.
- **Legal_Terms Manager:** Maintains the master Terms, local variants, and review calendar.
- **Legal Operations:** Manages legal intake, records, escalations, and regulator correspondence.
- **Product and Engineering:** Implement checkout disclosures, version capture, and publication controls.
- **Customer Operations:** Applies approved procedures and records customer decisions in CaseHub.
- **Commercial and Marketing:** Obtain approvals for claims, promotions, and customer-facing campaigns.
- **Finance:** Manages payment exceptions, refunds, and reconciliation.

- **Product Compliance:** Handles safety, conformity, recalls, and counterfeit escalations.
- **Marketplace Operations:** Ensures sellers receive and follow applicable contractual requirements.
- **Information Security:** Investigates account abuse, automated activity, and technical misuse.
