Stock and listing controls

- Products marked **Discontinued** must not be included in supplier replenishment proposals.
- Inbound products require receiving inspection before their availability status is changed to **In stock**.
- Chemical or resin-based craft products must remain in designated storage areas.
- Oversize flat goods may require special parcel handling.
- Warehouse locations refer to the primary catalogue allocation point and may differ from the final dispatch warehouse.
- Product prices should be checked against the current pricing table before customer-facing publication.
