Page 28 — Product Administration Notes

Size and fit conventions

IronStore uses EU sizing for most apparel. Where a supplier uses inch-based measurements, the product record includes waist and inseam values. Fit descriptions are standardized as follows:

- **Slim fit:** Close to the body with limited ease
- **Regular fit:** Standard ease through chest, waist, or hip
- **Relaxed fit:** Additional ease for comfort and layering
- **Oversized fit:** Deliberately broader proportions and longer or dropped construction
- **Compression fit:** Close-fitting technical garment intended to provide support

Customers should be directed to the product-specific size chart when available. Size charts are maintained separately from this catalog and may vary between product families.

Care-label handling

Care instructions in this catalog are the minimum operational guidance recorded for product listing and returns processing. The sewn-in care label takes precedence if there is a discrepancy. Products marked **dry clean only** must not be described as machine washable in customer-facing content.

Availability and replenishment

- **In stock:** Standard fulfilment stock is available in the listed warehouse.
- **Low stock:** Available quantity is below the normal replenishment threshold.
- **Seasonal:** Stock is tied to a seasonal buying plan; replenishment is not guaranteed.
- **Discontinued:** The item is not scheduled for replenishment. Remaining units may be sold until stock is exhausted.
- **Pre-order:** Not currently stocked for immediate dispatch; customer order is fulfilled against a confirmed inbound shipment.

Warehouse transfer guidance

Stock transfers between warehouses require an inventory movement record and updated bin confirmation. Product availability shown in this catalog is warehouse-specific and may not reflect same-day reservations, damaged stock, customer returns, or units awaiting quality inspection.
