Page 28 — Catalog Control Notes

Product data maintenance

The following fields are maintained in the IronStore product information system:

- Product title
- SKU
- Category path
- Supplier brand and model reference
- Short description
- Net selling price
- Tax treatment
- Stock status
- Warehouse assignment
- Product dimensions and weight
- Replacement and compatibility references
- Discontinuation status

Operational notes

1. Gas grills must be shipped with the regulator and hose configuration specified on the product record.
2. Ceramic grills and pizza ovens require oversize or two-person handling where indicated by the fulfillment system.
3. Charcoal, briquettes, firelighters, and wood products must not be consolidated with restricted chemical goods.
4. Covers should be checked against both width and height before substitution.
5. Replacement parts must be matched to the appliance model and not solely to cooking-surface diameter.
6. Discontinued products remain searchable for historical orders, warranty cases, and replacement recommendations.
7. Prices and availability in this catalog reflect the August 2026 internal review and may change following supplier, logistics, or tax updates.
