Catalog handling rules

- Medical devices must retain the applicable conformity and language documentation for the destination market.
- Supplements must be shipped using the current batch with the longest available remaining shelf life, subject to stock rotation rules.
- Cosmetic products must remain sealed and stored within the temperature range specified by the supplier.
- Battery-powered products should be stored separately from damaged or leaking batteries.
- Product specifications must not be modified in customer-facing systems without an approved catalog change request.
- Discontinued products remain searchable for returns, warranty processing, replacement guidance, and historical order support.
