16 Utility and emergency lighting
17 Discontinued products
18 Warehouse and availability reference

Catalog conventions

- Prices are standard retail prices in euros.
- Product dimensions are stated in millimetres unless noted otherwise.
- “Integrated LED” products do not accept replaceable bulbs.
- IP ratings apply only when the product is installed according to the supplied instructions.
- Availability is captured at the August 2026 review and may change by warehouse or sales channel.
- Warehouse codes identify the primary fulfilment location, not necessarily the supplier location.
- Products marked **This product has been discontinued** should not be included in new range-building activity.

Availability review guidelines

- **In stock:** May be allocated to standard customer orders, subject to available-to-promise quantity.
- **Limited stock:** Merchandising teams should avoid promotional volume commitments without inventory approval.
- **Backorder:** Customer-facing estimated dates must be taken from the current replenishment record.
- **Discontinued:** Do not create new purchase orders. Existing sellable inventory may remain active until depleted.
- **Residual stock:** Product can be sold while units remain, but should not be used as the basis for range expansion.

Product data maintenance

The following fields require review when a supplier specification changes:

1. Price and VAT treatment
2. SKU and barcode mapping
3. Integrated versus replaceable light source
4. Wattage and luminous flux
5. Colour temperature
6. IP and protection class
7. Dimensions and package weight
8. Warranty period
9. Warehouse assignment
10. Availability and replenishment status
